LinkedIn Profile • GitHub Portfolio

PROFESSIONAL SUMMARY

Motivated second-year Computer Science and Business Systems student seeking an IT internship to apply programming fundamentals, strengthen problem-solving skills, and learn from real-world development tasks. Familiar with Python, Java, HTML, CSS, Flask, basic NLP, and AI tools. Interested in developing useful technology solutions across AI applications, automation, accessibility, and smart retail. Eager to learn new tools, collaborate with a team, and contribute to practical software projects.

EDUCATION

B.Tech — Computer Science and Business Systems (CSBS)

St. Peter's College of Engineering and Technology | Second Year | Expected Graduation: 2029 | **CGPA: 8.24**

TECHNICAL SKILLS

Programming: Python, Java **Web:** HTML, CSS **Framework:** Flask

AI / Text Processing: Basic NLP, AI tools **Productivity:** MS Word, Excel

SELECTED PROJECTS

AI Code Debugger & Test Agent — Exploring an AI-assisted workflow concept designed to help users review code, spot potential errors, understand debugging suggestions, and create test cases across multiple programming languages.

Resume Relevance Checker — Flask-based resume-matching project that compares resume content with a job description. Uses text-processing/NLP techniques to identify relevant terms and estimate how closely a resume aligns with a role; intended to support faster initial screening.

Sign Language Translator — Accessibility-focused project exploring camera-based sign recognition to support communication between sign-language users and others. The proposed flow uses a camera input to recognize signs and present an understandable output.

RetailNova Smart Trolley — Smart-retail project concept focused on product identification and billing directly through a trolley-mounted system. The team is exploring barcode scanning, item removal handling, and embedded/IoT components to make shopping checkout more convenient.

Nira — Tamil Voice Assistant — Tamil-focused voice-assistant project aimed at making government-scheme information easier to explore through a simple, user-friendly interaction flow.

HACKATHONS & ACHIEVEMENTS

Participated in / worked on projects for **HackArena**, **Code4EdTech Hackathon**, and **EY Techathon 6.0**; also participated in paper presentations.

CERTIFICATIONS & TRAINING

NPTEL Java: 79% **Maiyyam training/certificates:** AI, Data Analytics, and Digital Marketing.

CORE STRENGTHS & ADDITIONAL INFORMATION

Core strengths: Communication, teamwork, leadership, and time management.

Languages: Tamil, English **Career interest:** Software development, AI applications, and data analytics.
